

INFOS Ammonia Refrigeration Training Software

INFOS is perhaps the most comprehensive interactive computer-based ammonia refrigeration training program available anywhere. It offers a complete overview of ammonia refrigeration from the basics to the most complex systems and components. The INFOS development team has 122 years of NH₃ refrigeration experience. You can read more about the software and download a demo version at <http://infosnh3.com/index.htm>.

The INFOS system includes a calculator for vessel and pipe capacities, English-Metric conversions, and NH₃ spill quantities. It also provides the OSHA required annual Responder Training and retains in the computer OSHA/PSM required documentation of training time, test results, and Responder Medical, SCBA, and Fit Test dates. The program includes 150 employment interview test questions specific for technician, supervisor, or plant engineer positions and allows for the addition of another 150 owner-developed test questions which can be administered by the program. In addition INFOS provides over 750 drawings, over 2000 pages of text, and over 120 hours of instruction and test time. There are also more than 450 operator and responder test questions. All drawings and text are printable. INFOS's random access feature, 95 control device items, and printability make the software an excellent reference tool for troubleshooting.

According to one IARW member, who paid more than \$50,000 to outside consultants, "We could have spent \$3,000 for the INFOS system and come very close to getting everything we got from our consultant. It's got all the hard stuff in it."

In partnership with Industrial Information Systems, Inc., IARW and WFLO are offering this software to members at an extremely favorable price, \$900 less than the normal bulk discount price. To order by credit card or to receive a demo copy, fax this form to 703-373-4301. To pay by check, send this form along with your payment to: World Food Logistics Organization, PO Box 79753, Baltimore, MD 21279-0753.
